Northern.searobin

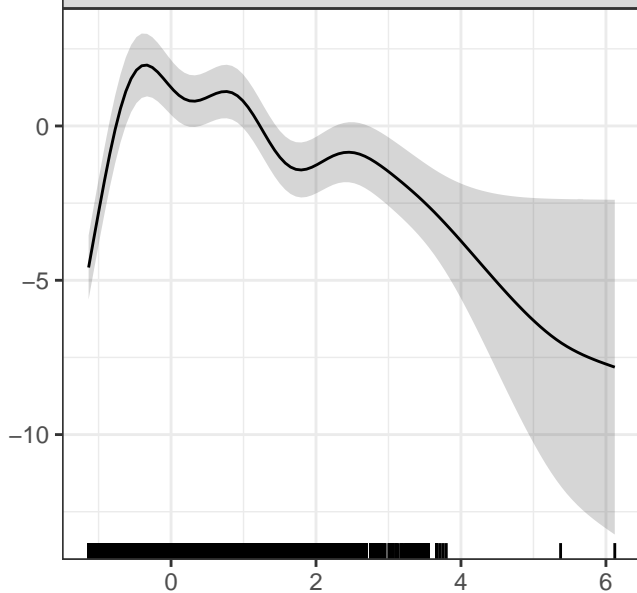

This graph shows the effect of sea depth on Northern.searobin. The y-axis ranges from -50 to 25, and the x-axis ranges from -1 to 6. The solid black line starts near 0 at depth -1, remains relatively flat until depth 2, and then decreases to approximately -15 at depth 6. The light gray shaded confidence interval is very wide, especially at higher depths. The density bar at the bottom shows a peak around depth 3.

Striped.searobin

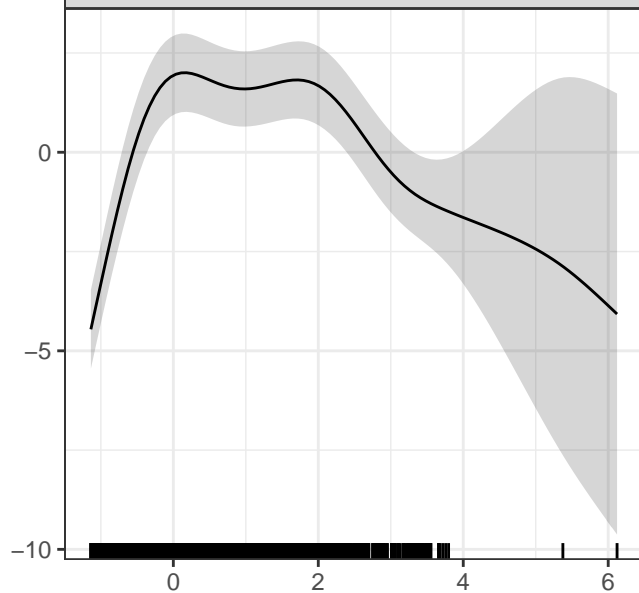

This graph shows the effect of sea depth on Striped.searobin. The y-axis ranges from -20 to 0, and the x-axis ranges from -1 to 6. The solid black line shows a consistent decrease from approximately 2 at depth -1 to approximately -17 at depth 6. The light gray shaded confidence interval is wider at higher depths. The density bar at the bottom shows a peak around depth 3.
